

Landley Bernardo, MIT

Masters in Information Technology

Senior Software Engineer

AWS Certified AI Practitioner (AIF-C01)

PROFESSIONAL SUMMARY

My professional journey is defined by a rapid evolution from academic leadership to high-impact technical innovation. Beginning my career at my Alma Mater, I progressed from an Associate Instructor to a Master's-level Instructor, where I designed specialized curricula in Java and mentored future engineers. Transitioning into the private sector, I spearheaded digital transformation for the property management industry, eventually co-founding Propsuite as CTO. There, I architected a platform that reduced administrative overhead by 75% through Agile leadership and rigorous performance metrics.

Today, I am at the forefront of the next technological frontier as an AWS Certified AI Practitioner (AIF-C01) and Software Engineer specializing in Generative AI. I architect scalable intelligent systems using LLMs, RAG, and AWS AI services, bridging the gap between complex technical architectures and tangible business value.

EDUCATION

Saint Louis University

Baguio City, Philippines

Bachelor of Science in Computer Science

July 2013 - June 2017

Thesis: AN INSIGHT ON THE MOTIVATION, PERFORMANCE, LEARNING EXPERIENCE AND ENGAGEMENT OF STUDENTS' LEARNING IN A GAMIFIED LEARNING MANAGEMENT SYSTEM

Saint Louis University

Baguio City, Philippines

Masters in Information Technology

July 2018 - June 2021

Capstone Project: SCREENING PRODUCT IDEAS THROUGH USER-GENERATED CONTENT IN SOCIAL MEDIA TO ASSIST SMALL AND MEDIUM

Asian Institute of Management

Makati City, Philippines

Startup Incubator Program (Accelerator Program)

July 2022 - July 2023

Startup Company: PropSuite

SKILLS

- Languages: HTML, CSS, JS, Python, PHP
- Back-end: Node.js, FastAPI, Flask, Laravel, RESTful APIs
- Front-end: React.js, Next.js, Responsive design (Bootstrap, Tailwind CSS)
- Databases: MySQL, Redis
- AI Ecosystems: AWS Bedrock, Amazon SageMaker, OpenAI API

- Generative AI: LLM, Prompt Engineering, Agentic Workflows
- DevOps: GitHub Actions
- Security: JWT/OAuth, Data Privacy Compliance
- Methodologies: Agile/Scrum, Kanban
- Tools: Git/GitHub, Jira, Postman
- Principles: Clean Code, SOLID Principles, Design Patterns
- Business Analysis: Requirement Gathering, SDLC Management, Stakeholder Communication

CERTIFICATIONS

AWS

AWS Certified AI Practitioner (AIF-C01)

March 14, 2026 - March 14, 2029

RELEVANT WORK EXPERIENCES

Straive

Senior Software Engineer

Paranaque City, Philippines

Feb 2023- Present

- Architecting and deploying high-scale, intelligent applications by leveraging the AWS AI ecosystem, specifically focusing on the integration of Large Language Models (LLMs) to solve complex business logic challenges.
- Engineering sophisticated Retrieval-Augmented Generation (RAG) pipelines and autonomous agentic workflows using Amazon Bedrock and SageMaker, enabling models to interact with real-time data and execute multi-step tasks.
- Implementing robust GenAIOps frameworks to ensure AI solutions are secure, scalable, and production-ready, with a heavy emphasis on model performance optimization and latency management.
- Designing and maintaining cost-effective cloud architectures on AWS, balancing high-compute generative tasks with budget-conscious resource allocation and auto-scaling.
- Seamlessly merging deep Full-Stack development expertise with modern AI trends to build "context-aware" systems that move beyond simple prompting into fully integrated enterprise tools.
- Enforcing rigorous security protocols for AI data handling, ensuring that LLM integrations comply with enterprise data privacy standards and maintain high-fidelity outputs.

Martha Property Management

Philippines

Full-Stack Web Developer

Baguio City,

Jun 2018 - Jan 2021

- Spearheaded the overhaul of legacy operations by migrating manual, paper-based workflows into a centralized, automated web ecosystem, significantly increasing operational throughput and data integrity.
- Designed and deployed end-to-end web applications, ensuring high-performance synchronization between intuitive, responsive UIs and robust back-end database architectures.
- Engineered scalable financial management modules to automate rent tracking and audit reporting, reducing human error and accelerating month-end reconciliation cycles.
- Acted as a strategic bridge between executive stakeholders and technical execution, translating complex Property

Management and Financial Auditing requirements into actionable technical specifications.

- Optimized the software development lifecycle (SDLC) to meet critical business deadlines, delivering mission-critical tools for maintenance scheduling and asset management.

Saint Louis University

Philippines

Faculty Member (Instructor II)

Baguio City,

Sep 2021 - Jan 2023

- Delivered a comprehensive Web Fundamentals curriculum, specializing in modern front-end stacks including HTML5, CSS3, and JavaScript (ES6+).
- Instilled production-grade standards by teaching the Full Software Development Lifecycle (SDLC) and emphasizing clean code, DRY principles, and version control.
- Elevated code quality by transitioning students from basic syntax to advanced architectural patterns, modularity, and scalable design structures.
- Standardized the CS foundation as a lead faculty member, ensuring a rigorous technical baseline for 100+ aspiring software engineers.

Saint Louis University

Faculty Member (Instructor I)

Baguio City, Philippines

Feb 2018 - May 2018

- Modernized Java Programming curriculum by integrating K-12 educational reforms and emerging industry trends, ensuring 100% alignment with current tech standards.
- Instructed advanced coursework in Networking, General IT, and Java, consistently achieving high student engagement and performance ratings among upper-level undergraduates.
- Facilitated career transitions as an Internship Adviser, providing strategic mentorship that converted academic theory into professional success for graduating seniors.
- Bridged the "Skills Gap" by collaborating with leadership to transform theoretical computer science concepts into project-based, real-world applications.

LEADERSHIP

PropSuite

CTO and Co-founder

Baguio City, Philippines

Jan 2021- Jan 2023

- Co-founded and spearheaded the technological vision for a high-growth startup, overseeing the entire product lifecycle from initial architectural design to global deployment and scaling.
- Defined and executed the company's long-term technical roadmap, aligning engineering efforts with core business objectives to deliver a specialized property management ecosystem.
- Implemented Agile/Scrum methodologies as acting Scrum Master, optimizing sprint velocity and fostering a culture of rapid, continuous improvement and high-quality delivery.
- Established rigorous industry best practices, including Test-Driven Development (TDD), peer code reviews, and automated CI/CD pipelines to ensure 99.9% application reliability.
- Developed and monitored custom Key Performance Indicators (KPIs) and performance metrics, leveraging data analytics to optimize user engagement and system throughput.
- Engineered automation solutions that reduced user administrative overhead by 75%, effectively shifting client

focus from manual paperwork to high-value customer service and growth.

- Managed the technical budget and resource allocation, ensuring the lean and efficient scaling of infrastructure to support an expanding user base.
